Two 11MM Btu Glycol Heaters c/w Pumps & Control Room***

WELLONS CANADA PROJECT SCOPE:

- Two (2), 11MM BTU/hr double helical coil gas fired glycol (EG) heaters, shop assembled into skid mounted heater units c/w gas combustors, stacks, testing platforms and piping
- Three (3), 50% capacity EG glycol circulation pumps with headers
- Combustion air fans w/ preheaters, gas trains and BMS systems
- Shop assembled control room skid common to both heaters, to enclose the pumps; combustion air fan and preheaters; and combustors and gas trains.
- Expansion tank and drain/fill tank with support structure and access platform
- Shop installation of glycol piping on the two heater skids and in the control room; and shop fit pipe spools for field installation to interconnect the equipment modules
